With over 20 years of experience as a professional Cinematographer/DP, I have worked with top networks and brands such as National Geographic, CNN, Callaway, Patron, and Hasbro. I am proficient in a variety of camera systems including Arri, Sony, Red, Canon, and more. In addition, I have 10 years of experience in drone operation and am FAA certified, providing unique and dynamic aerial footage to productions. I am also scuba certified and experienced in underwater filming, with a passion for exploring the depths and capturing stunning underwater imagery. My experience includes working with large and small crews, and I am able to effectively communicate with multiple departments to achieve the director's goals. I have strong communication skills and the ability to work collaboratively with directors, producers, and talent to bring creative visions to life. Additionally, I am detail-oriented with a keen eye for lighting and composition, ensuring the highest quality visuals in all projects.

Below is a short list of work as Cinematographer-Director of Photography
